

# CONCUR INVOICE INTEGRATION FOR SAGE

## THE PROBLEM

BI-DIRECTIONAL  
INTEGRATION

COMPLICATED,  
ERROR PRONE  
EXPORT/IMPORTS

TIME  
CONSUMING  
DATA ENTRY

## THE SOLUTION

The Connector for Concur Invoice & Sage eliminates cumbersome manual file manipulation, export & imports, by integrating Concur Invoice directly with your SageX3, Sage300, Sage200 UK, Sage50 UK solution.

Invoices are posted directly into your Sage solution – including complex tax, project, multi-currency, & multi-entity implementations where the integration is driven by a set of rules configured through the connector.

Where the out-of-box integration doesn't meet your needs, customisations can be made easily without the need for custom development since the Connector for Concur Invoice & Sage is powered by Realisable's code-free integration platform.

THE CONNECTOR FOR  
CONCUR INVOICE & SAGE IS A  
CUSTOMISABLE SOLUTION  
WHICH INTEGRATES INTO A  
RANGE OF SAGE SOLUTIONS

THE CONNECTOR FOR  
CONCUR INVOICE & SAGE  
PROVIDES BI-DIRECTIONAL  
INTEGRATION & SUPPORTS  
POSTING OF INVOICES INTO  
BOTH YOUR SAGE'S  
ACCOUNTS PAYABLE AND  
PURCHASE ORDER MODULES

## SAP CONCUR AND YOUR SAGE SOLUTION

With multi-module support, Realisable leverages the functionality of your Sage solution. The Connector for Concur Invoice & Sage provides a set of options to not only define how data is mapped into Sage, and supports invoice posting into both Purchase Ledger (A/P) and Purchase Order modules. The connector provides support for project, multi-currency, & multi-entity implementations.

## FEATURES AT A GLANCE

- Standard & professional editions supported.
- Post invoices into Purchase Ledger (A/P) module or;
- Post for purchase order associated invoices – posting into Purchase Order module of your Sage solution (ex. Sage50).
- Upload purchase order records from Sage to SAP Concur for 2-way and 3-way matching.
- Definable field mapping.
- On-demand or scheduled dual-direction integration.
- Manage invoice integration across multi-company instances of Sage.
- Support for multi-currency, multi-entity & project accounting.
- Supports SageX3, Sage300, Sage200 (UK), and Sage50 (UK).

## ABOUT REALISABLE

Realisable Software, founded in 2010, are developers of IMan, a leading middleware and integration platform for Sage solutions. Across its install base, Realisable IMan sites handle tens of millions of transactions annually in virtually every industry. Realisable operates globally with clients covering Europe, the Middle East, Asia, the Americas, Africa and Australasia.
