

Adobe Commerce (Magento)

Realisable IMan

IMan is a highly versatile configuration-based integration platform for

- Sage 300
- Sage 200
- Sage 50
- Sage Intacct
- Sage X3
- Sage CRM

Sage

IMan's deep connectivity with Sage products ensures that you can integrate your operational back- and front-end solution with confidence.

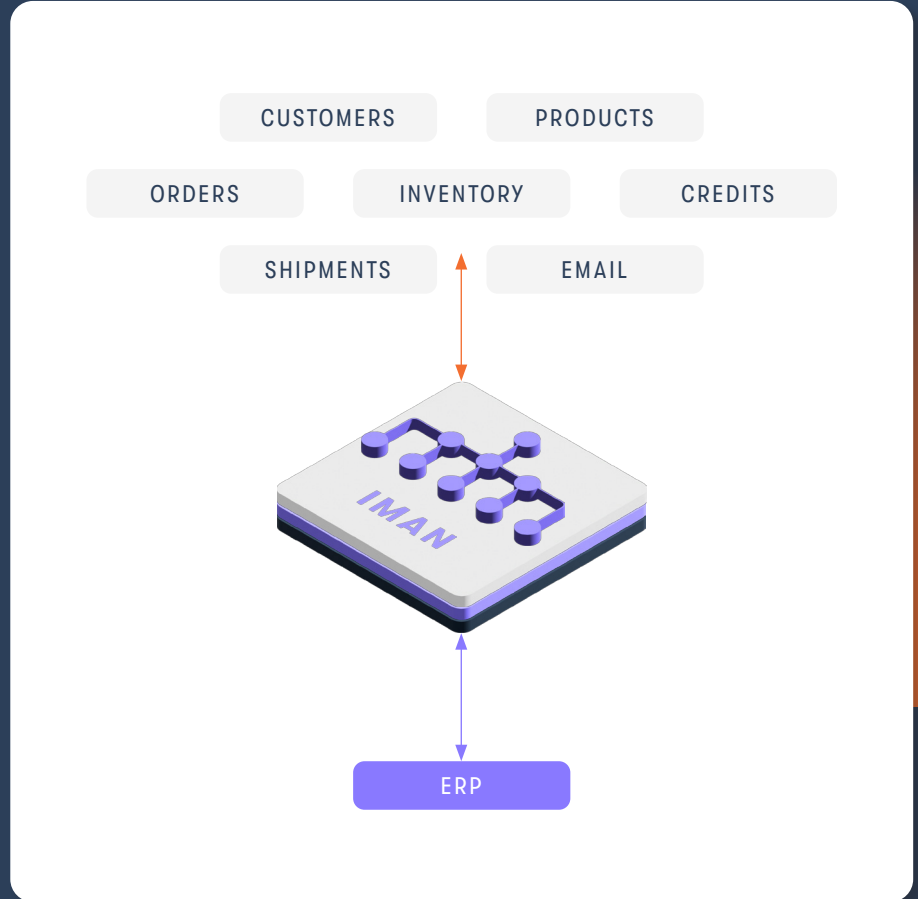

Our visual designer requires no code, allowing you to automate your business processes quickly and easily.

Access world-class documentation, training materials and online support to customise with enterprise-level functionality without the complexity.

Our customers around the world use IMan to simplify their integration challenges and automate their order fulfilment processes. Improve efficiency and reduce the number of manual tasks in your business with IMan.

Magento connector

Our **smart Magento connector** provides deep and robust, bidirectional integration for B2B/B2C ecommerce stores with your ERP or accounting solution.

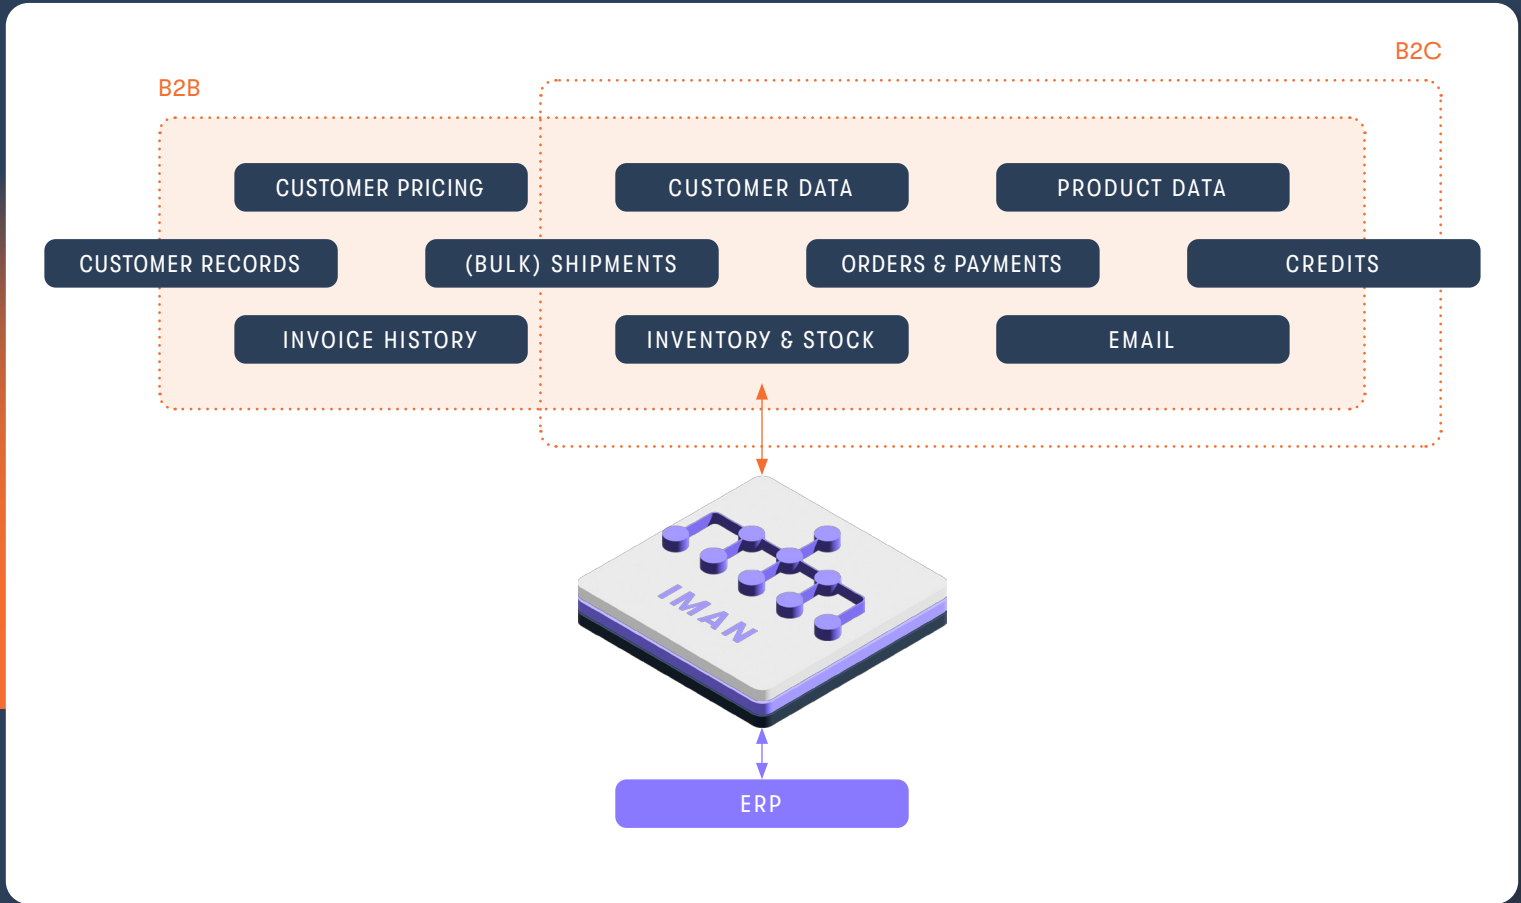

Deep Magento integration

The Magento integration for IMan is feature-rich to meet your business needs. IMan's code-free integration platform provides the capability to completely automate your ecommerce order fulfilment where custom and business-specific processes can be incorporated into any data flow.

- Standard integrations for processing orders from Magento into Sage; syncing of product and inventory; upload of shipment and tracking data to Magento
- Auto-purchase order generation for businesses with dropship, back-to-back sales/purchase order fulfilment

- Integration with warehousing, WMS, 3PL and logistics systems
- Integration with payment processing and credit checking platforms
- Automated invoice generation and distribution
- Customer alert and order confirmation notifications

Common features

- Feature-rich order download which includes item and customer attributes, custom field support, payment data, configurable items, bundles and product options
- Support for Multi-store/Multi-website instances and even separate Magento instances
- Shipment upload from Sage to Magento including shipment tracking info
- Fast upload of product master data with full product attribute support
- Sync inventory to Magento with support for multiple inventory sources

- Download of product data from Magento to support businesses using Magento as their PDM
- Download of shipments from Magento to support businesses using Magento for fulfilment
- Download credits and refunds from Magento to generate the corresponding credit/refund data in Sage
- A set of pre-configured, fully customisable integrations has been created allowing you to rapidly integrate Magento with your Sage application

B2B features

- Fast sync of customers and customer ship-to addresses from Sage to Magento
- Sync customer-specific pricing from Sage to Magento. Our Magento extensions allow both syncing of price list and contract price records from Sage. The extensions also provide consistent pricing display through the different Magento product views
- Full customer portal provides ability to view invoice, credit note, payment history and non-Magento orders
